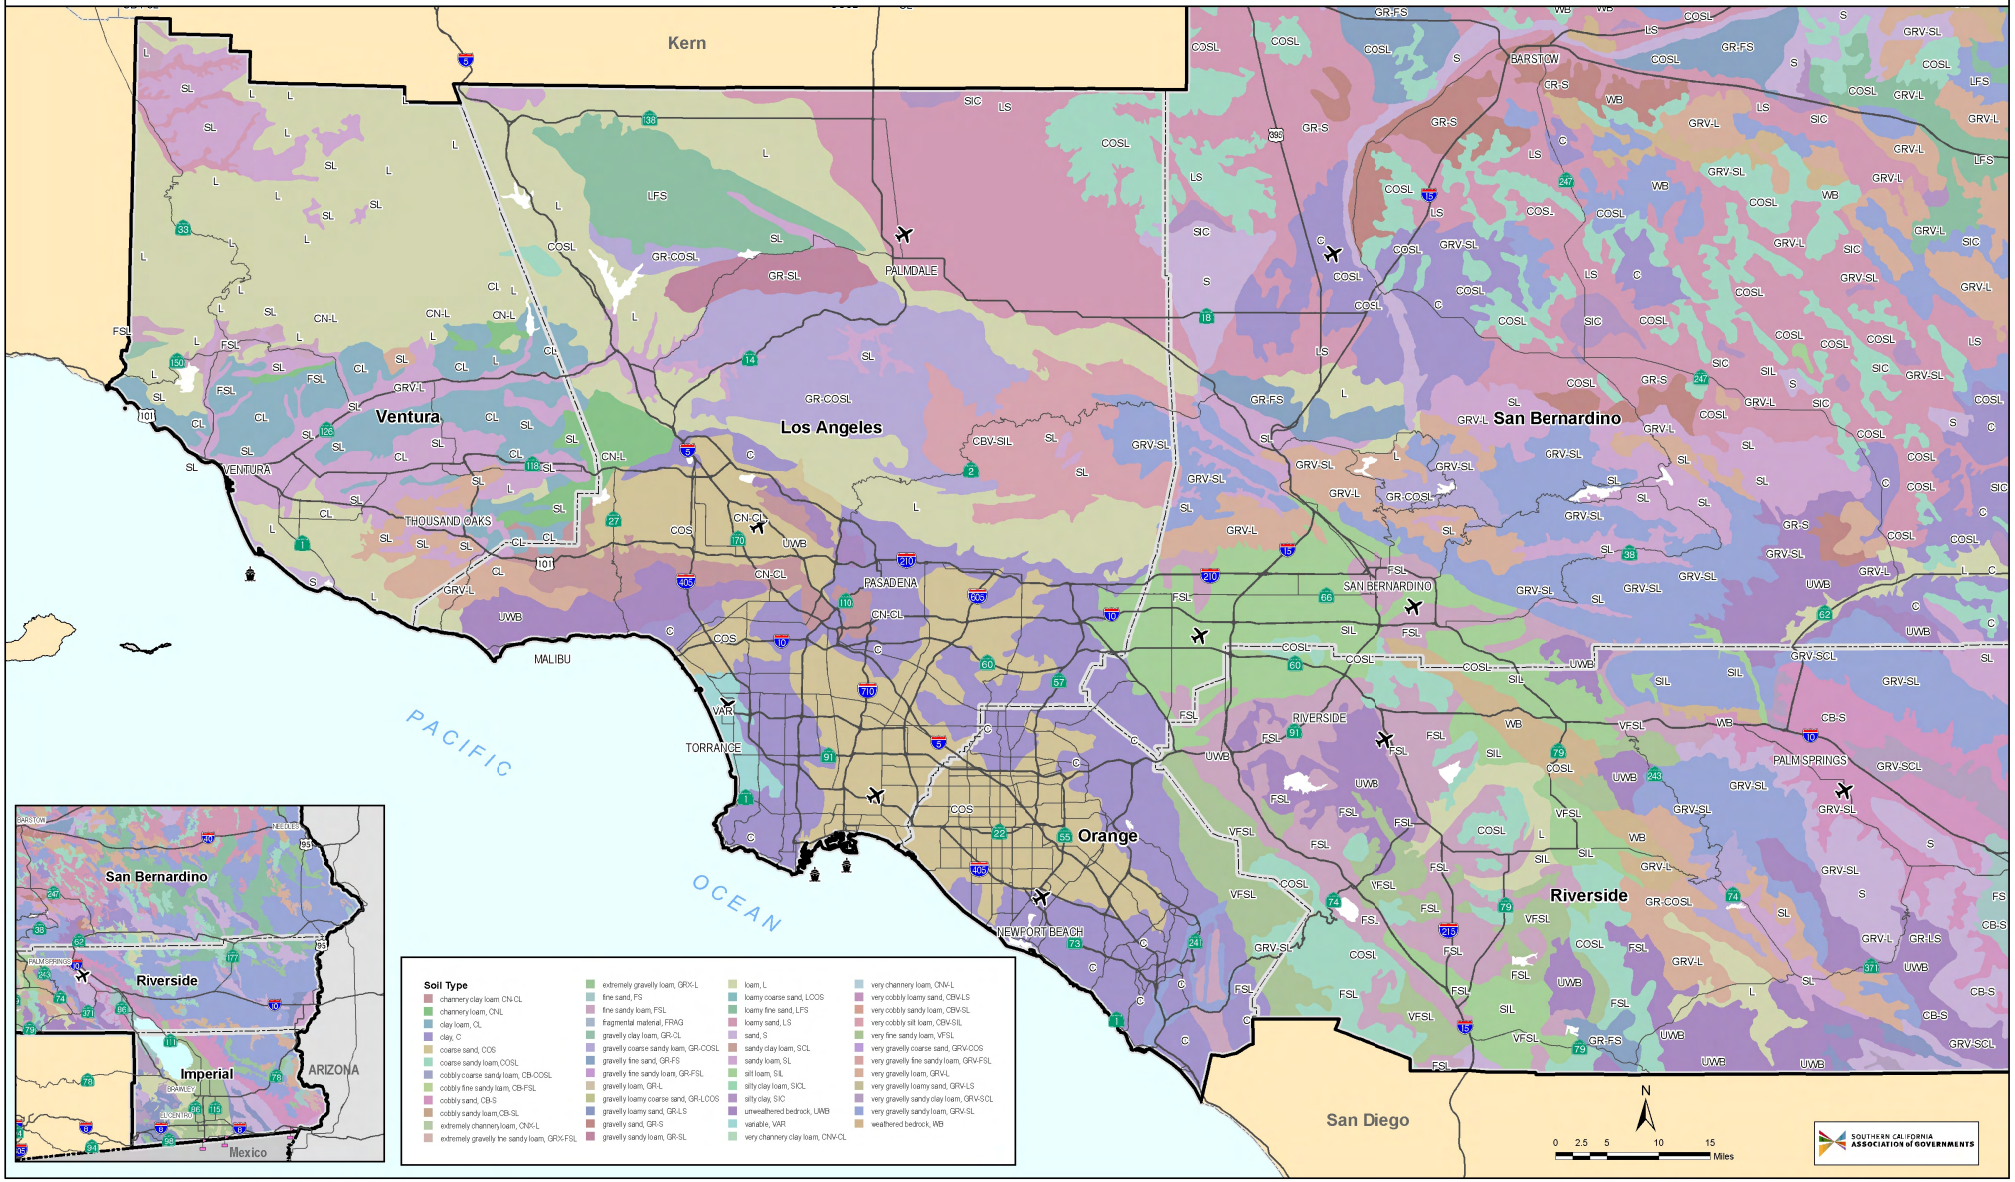
Map 3.6-1 Geomorphic Provinces

Source: Department of Conservation California Geological Survey, Southern California Association of Governments, ESRI StreetMap USA, Teleatlas

O:\mxd\2007\mxd\FINAL\3.6-1 Geomorphic Provinces.mxd EMW 11/20/2007

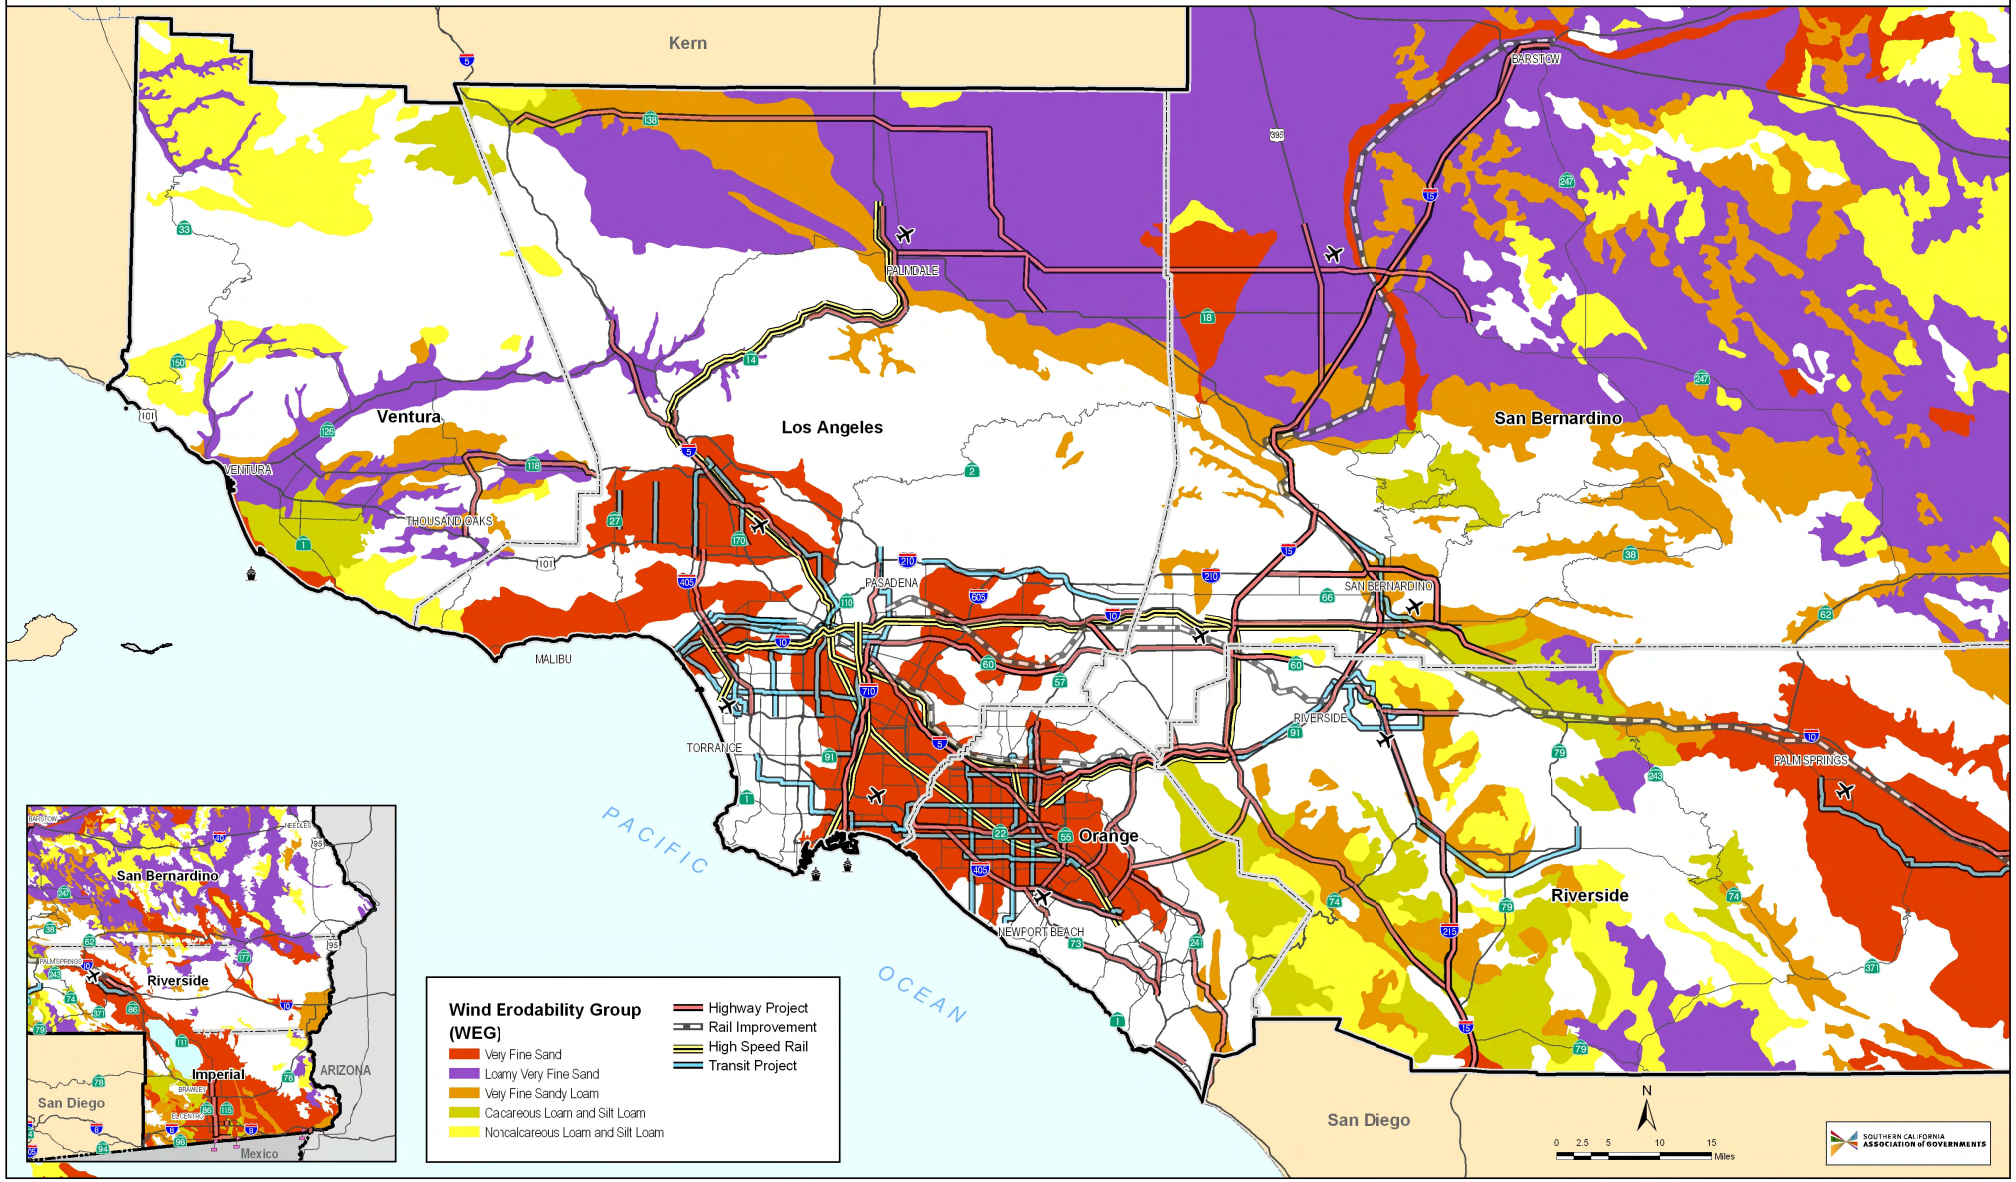
Map 3.6-2 General Soil Types



Source: U.S. Department of Agriculture, Natural Resources Conservation Service, Southern California Association of Governments, ESRI StreetMap USA, Teleatlas

O:\eir2007\mxd\FINAL\3.6-2 General Soil Types.mxd EMW 12/14/07

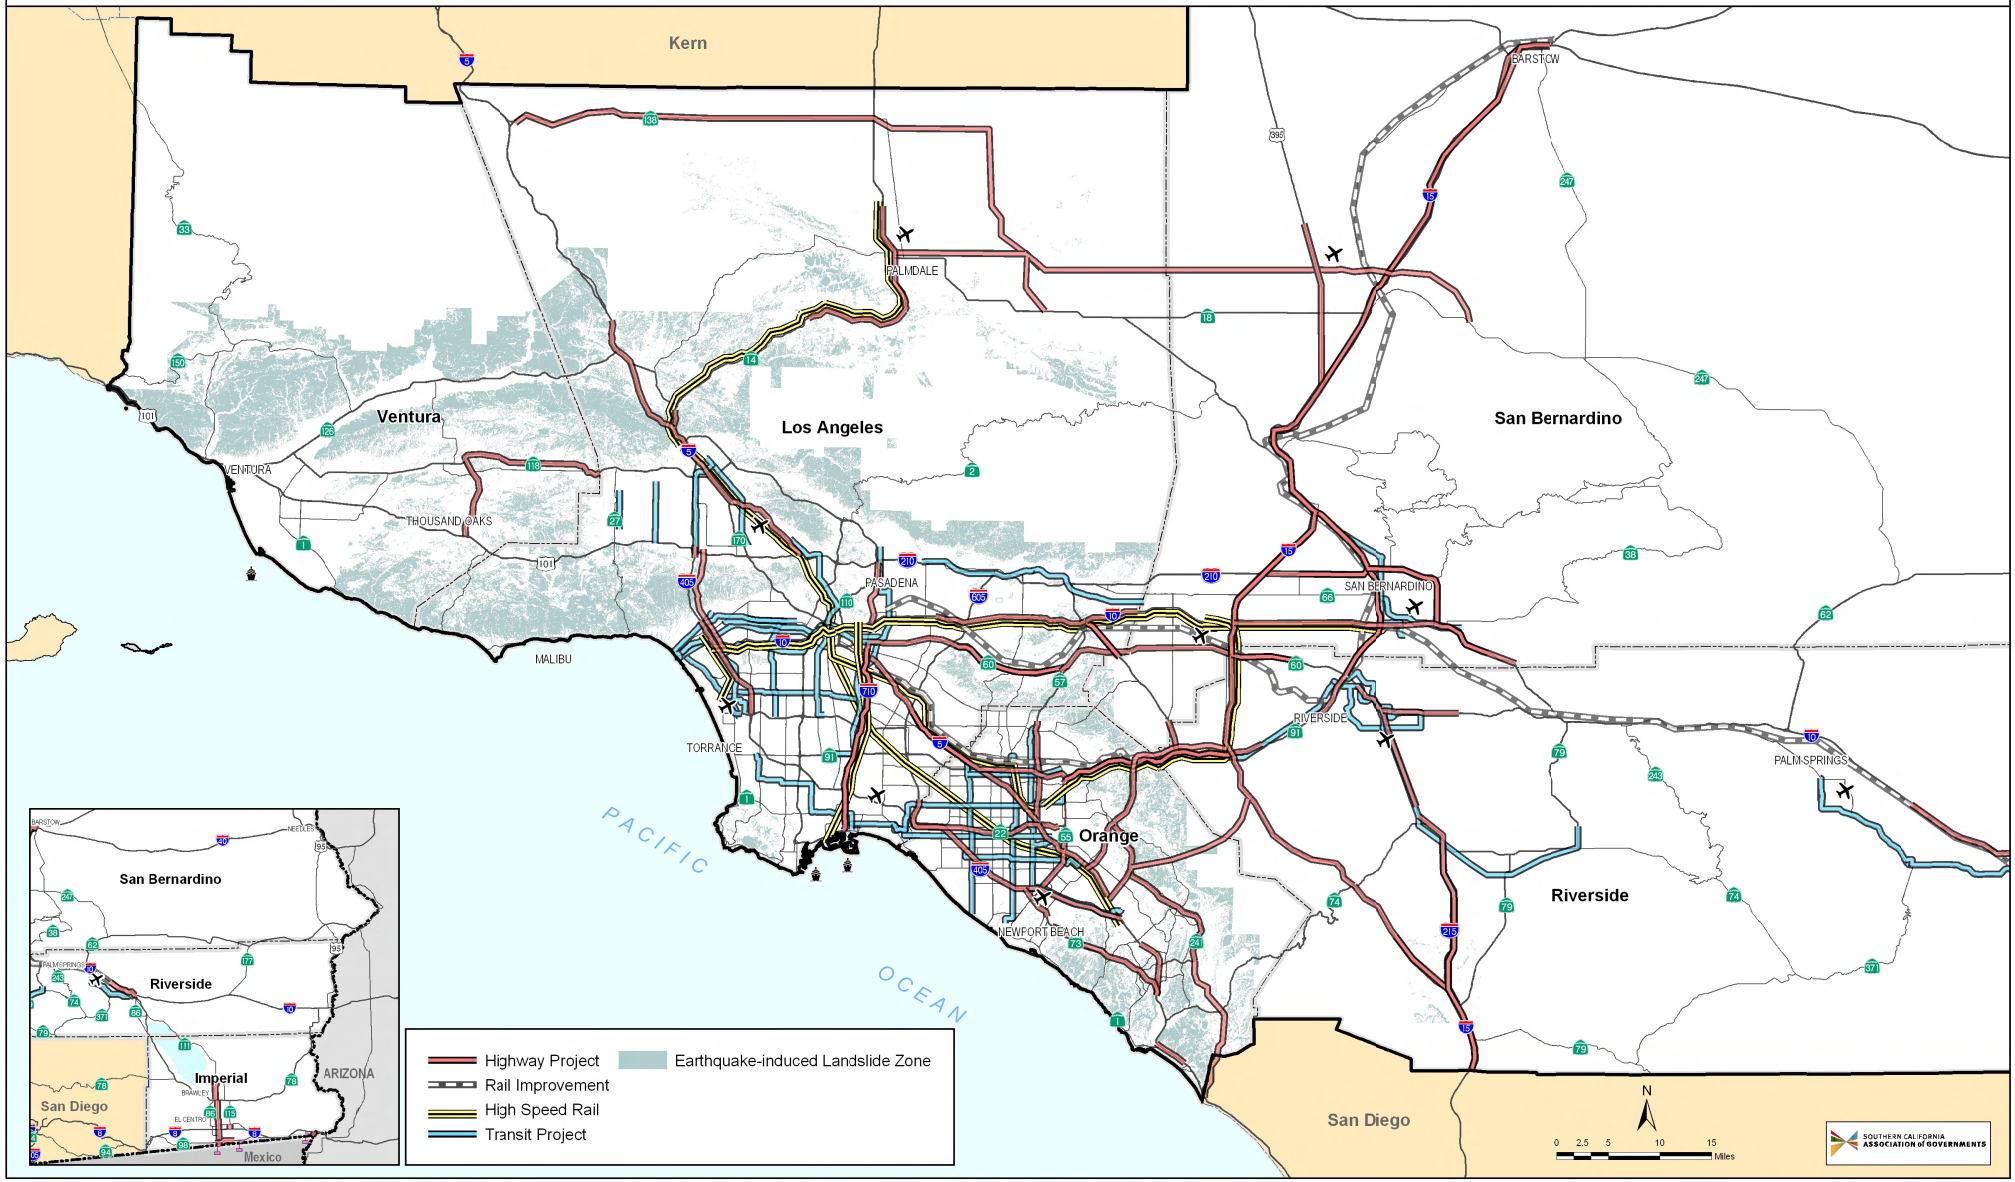
Map 3.6-3 Location of Soils with Moderate to High Erosion Potential



Source: U.S. Department of Agriculture, Natural Resources Conservation Service, Southern California Association of Governments, ESRI StreetMap USA, Teleatlas

O:\eir2007\mxd\FINAL\3.6-3 Erosion Potential.mxd EMW 11/13/07

Map 3.6-4 Relative Landslide Potential*

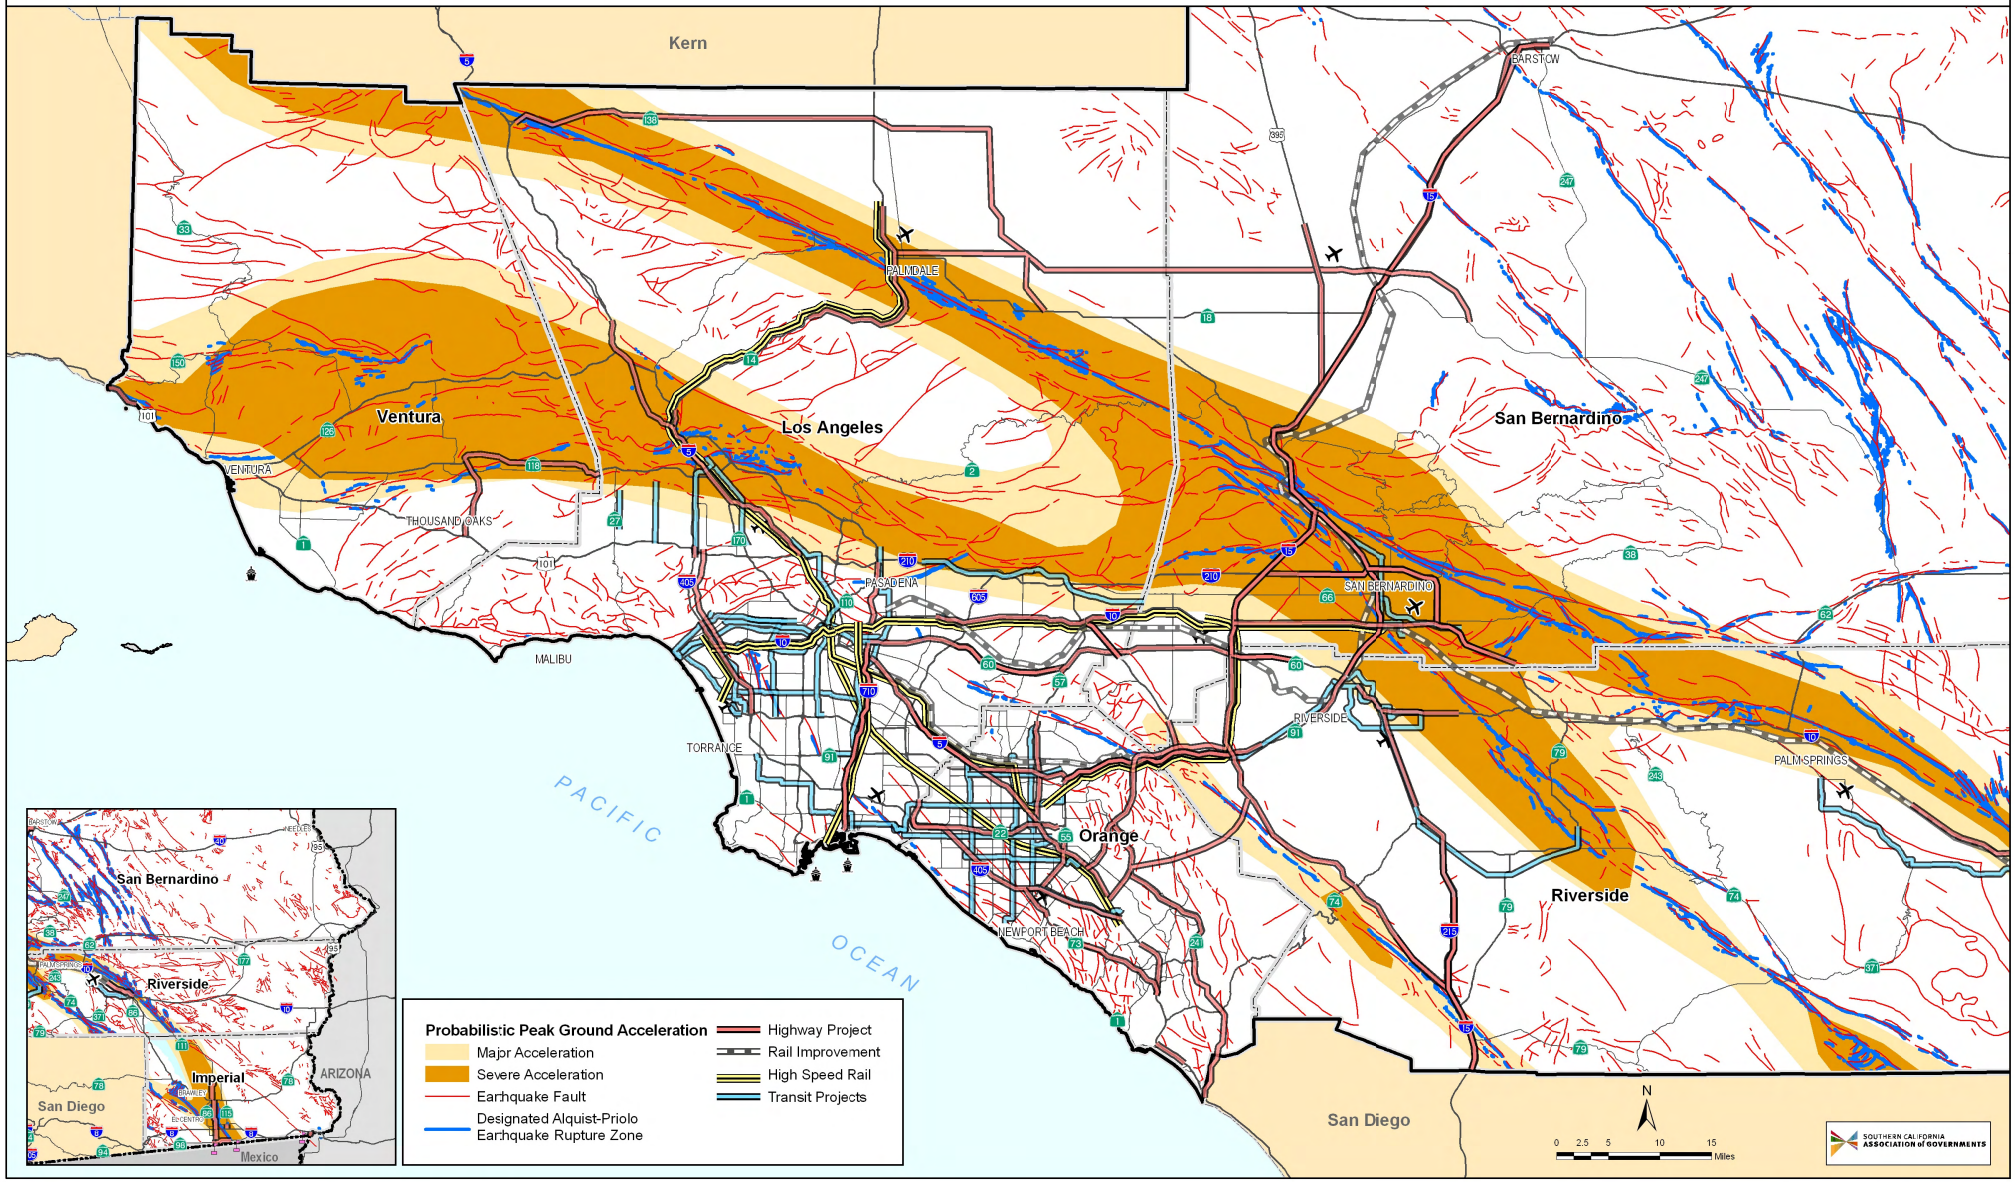


Source: California Geological Survey, Seismic Hazard Mapping Program 2002, Southern California Association of Governments, ESRI StreetMap USA, Teleatlas

*Note: The Earthquake-induced landslide zones only represent the extent for Southern California that has been mapped by CGS. Many areas have yet to be mapped.

O:\e-eir2007\mxd\FINAL\3.6-4 Relative Landslide Potential.mxd EMW 11/11/07

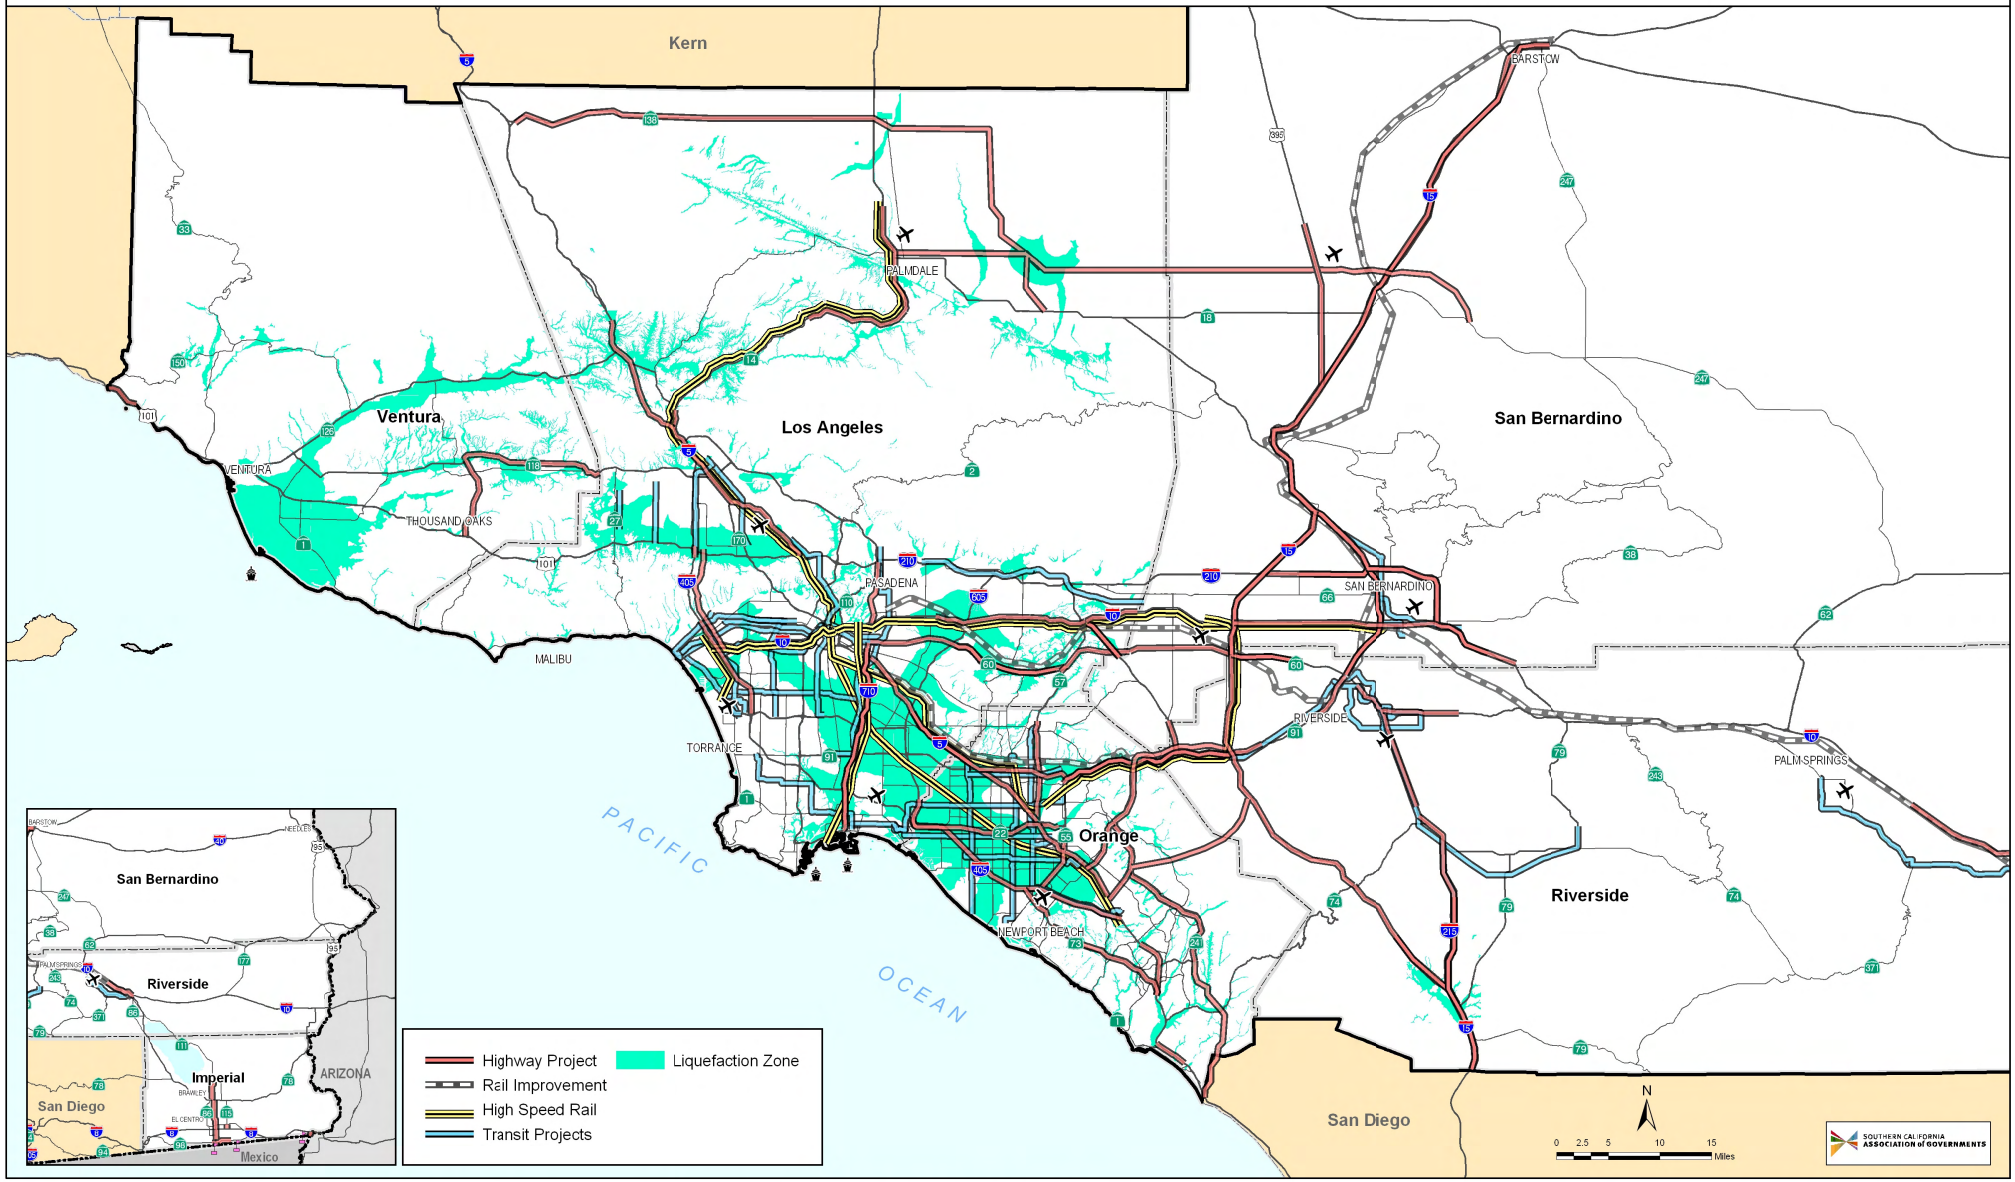
Map 3.6-5 Earthquake Faults and Probabilistic Peak Ground Acceleration



Source: California Geological Survey, Seismic Hazard Mapping Program, Southern California Association of Governments, ESRI StreetMap USA, Tileatlas

O:\eir2007\mxd\FINAL\3.6-5 Earthquake Faults.mxd EMW 11/13/07

Map 3.6-6 Areas Subject to Liquefaction*



Source: California Geological Survey, Seismic Hazard Mapping Program 2002, Southern California Association of Governments, ESRI StreetMap USA, Teleatlas

*Note: Liquefaction zones only represent the extent for Southern California that has been mapped by CGS. Many areas have yet to be mapped.

O:\e-eir2007\mxd\FINAL\3.6-6 Areas Subject to Liquefaction.mxd EMW 11/11/07
