Non-Intersection Improvements: access management, consider street widening, parking restrictions and grade separating rail road tracks where feasible, Consider lane width widening from I-105 to Imperial Hwy to better accommodate buses and trucks. Commerce: Please note that the City of Commerce is currently constructing the Washington Blvd Widening Project. It is currently in the construction phase. The project description is as follows: The project is a reconstruction and widening project covering a 2.7 mile segment of Washington Boulevard between Indiana Street to the Santa Ana (I-5) Freeway. The project will improve truck circulation and current level of service operations by reducing delays and traffic while improving the overall air quality. Enhanced ADA compliant sidewalks for pedestrians use and LED energy saving retrofit for street and pedestrian lights will be installed to increase pedestrian and vehicle safety through this heavily used corridor. This project will widen this segment from two lanes to three lanes in each direction, which will allow for an increase in the turning radius and larger medians for better traffic flow. Traffic signals, street lightings, and pedestrian improvements including upgraded ADA compliant sidewalks and landscaping are also part of the project plans.	Commerce
