## INTRODUCTION

---

The Federal Transportation Improvement Program (FTIP) is a federally mandated four-year program of all surface transportation projects that will receive federal funding or are subject to a federally required action. The SCAG 2025 FTIP is a comprehensive listing of such transportation projects proposed over fiscal years (FY) 2024/25 – 2029/30 for the region, with the last two years 2028/29 – 2029/30 provided for informational purposes. As the metropolitan planning organization for the six-county region of Imperial, Los Angeles, Orange, Riverside, San Bernardino, and Ventura, SCAG is responsible for developing the FTIP to submit to the California Department of Transportation (Caltrans) and the federal funding agencies. This listing identifies specific funding sources and fund amounts for each project with the purpose of implementing SCAG's overall strategy for enhancing regional mobility and improving both the efficiency and safety of the regional transportation system, supporting efforts to attain federal and state air quality standards for the region by reducing transportation-related air pollution and greenhouse gas emissions. Projects in the FTIP include highway improvements, transit, rail and bus facilities, high occupancy vehicle lanes, high occupancy toll lanes, signal synchronization, intersection improvements, freeway ramps, and non-motorized (including active transportation) projects.

The FTIP is developed principally through a bottom-up process by which the six county transportation commissions work with their local agencies and public transportation operators, as well as the public, to develop their individual county transportation improvement plan, SCAG developed the 2025 FTIP in partnership with the county transportation commissions and Caltrans.

The FTIP must include all federally funded transportation projects in the region and all regionally significant transportation projects requiring approval from federal funding agencies, regardless of funding source.

The projects included in the 2025 FTIP are consistent with SCAG's Connect SoCal 2024 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS), including its Amendment #1 (being processed concurrently with the 2025 FTIP). The FTIP is developed to incrementally implement the programs and projects contained in the RTP/SCS.

As required by 23 CFR 667, Resiliency for Federal Aid Projects, a review of the Repeated Disaster Damage (SORDD) table was completed, and two sites were found within the SCAG region in Ventura County which are subject to the 23 CFR 667 requirements. However, none of the projects programmed in the 2025 FTIP are found to be located on the two SORDD sites in Ventura County. Therefore, no further evaluation or reporting is required as part of the Resiliency for Federal Aid Projects process.

DESCRIPTION

Project includes the construction of roadway and traffic signal modifications at six existing traffic signal-controlled intersections in the City of Carson. These intersections experience significant travel delays and deficient levels of service when motorists divert from the I-110 freeway to avoid freeway congestion during peak hours. Completion of the intersection and signal improvements is anticipated to improve level of service and reduce delays at the project intersections. NO SIGNAL SYNC.

Project provides added safety to bicyclists traveling along Compton Bl and Rosecrans Av as they ride over Compton Creek. Currently, narrow width along Compton Bl and along Rosecrans Av at Compton Creek bridges create safety hazards to bicyclists traveling along both streets. Compton Bl bridge is 125 feet across. Rosecrans Av bridge is 130 feet across.

DESCRIPTION

Citrus Ave includes 80-100 feet of public R-O-W, two new bicycle travel lanes for N/B and S/B traffic (5,950 linear ft. of bike lanes to be added), repairing sidewalks and curb ramps. Foothill Transit serves the Citrus Ave corridor and provides additional multimodal transportation connectivity. Proposed improvements will enhance first/last mile connectivity, road/concrete infrastructure, pedestrian/bicycle safety, and add tree canopy and drought tolerant streetscaping amenities.

**DESCRIPTION**  
The Alameda St. widening project from Anaheim St. to Harry Bridges Blvd. will add one more lane in each direction to the existing arterial and reconstruct the pavement along with new sidewalks, curb and gutter, storm water system and landscape. The length of the project is about 1.0 miles and it will add capacity on projected traffic volumes from the Port of Los Angeles to the network of freeways by mitigating the existing traffic gridlock during peak hours.

**DESCRIPTION**  
The purpose of this project is to improve the merging area along MBB at Pacific Avenue, reduce congestion, improve safety and provide smoother traffic flow by potentially two options: Convert 1st WB through the lane to left-turn only lane (70 ft), and extend and elongate the merging area to the east (270 ft). Or reconfigure the intersection layout to create left-turn pockets for both EB and WB directions (70 ft), with the signal upgrade.

DESCRIPTION

Alameda Corridor Southern Terminus Gap Closure project. This project will provide separate rail access to two adjacent on-dock railyards, thus eliminating the potential for train collisions. The new double track segment will also reduce moving train blockages at two immediately adjacent rail crossings on roadways, which also reduces the potential for train-vehicular collisions.

**DESCRIPTION**

Widen the San Gabriel Boulevard and Valley Boulevard intersection to add a 120' SB right turn lane, 200' NB third thru lane, and add 90' collapsible bollards to eliminate left in/left out at Gladys Avenue. The project will also reconstruct the pavement at the intersection, replace damaged curb and gutter, driveway approaches, and reconstruct ADA ramps. The acquisition of right of way is needed to accommodate the proposed widening. Widening is less than 1/8 of a mile.

DESCRIPTION  
On segments between Virginia Road and Sunnyslope Drive, narrow the three through lanes of both EB and WB Huntington Drive to improve flow. Improvements will also include upgrading and increasing the quantity of driver feedback signs (those that show speed). The Huntington Drive improvements will alleviate the discernible impact of heavy congestion, delay, noise, and pollution caused by the lack of the SR 710 connector and the regional traffic spillover.

DESCRIPTION  
Design and install Compressed Natural Gas (CNG) fueling facility at the City's Public Works Services site. Currently, the City uses third-party public CNG fueling stations to fuel the City's transit vehicles. This fueling facility will allow the City to refuel these vehicles onsite so that normal operating activities are not interrupted. The CNG fueling facility will also ensure that City transit vehicles have dedicated access to CNG fuel in the event of an emergency.
